

The Mindshare Suite individual product descriptions

Mindshare 100500MAX Audio and Accessory Interface

The Mindshare 100500MAX Audio and Accessory Interface is a complete audio system for the dispatch workstation which also provides interfaces to accessories such as headset jacks, footswitches, speakers, desk microphones, a NENA telephone interface and more. Rather than relying on the limited capabilities (and often poor quality) of an ordinary computer “soundcard”, the Mindshare 100500MAX is designed specifically to satisfy the requirements of a dispatch console position, including support for up to eight 100508MAX speakers. The 100500MAX interfaces to the dispatch workstation computer via a standard USB connection, and is housed in a sturdy metal enclosure which is designed to be conveniently installed at the position.

The Mindshare Suite

- User Dispatch Interface
- Radio Interface Card
- Radio Interface Unit
